

Roller Blinds

2019

When both Quality & price matters- JUST FLOORING

Why choose Roller Blinds?

Roller Blinds are a simple solution to stop the sun damaging your home or business furniture and to give you privacy. Roller blinds can be made unto 3000mm width and you can choose from our range of control options including chain control, remote control,

Dual Rollers

Dual Roller blinds will save your view while giving you privacy and the option of blackout. We use a slim Acmeda dual bracket with a blackout roller to the internal side of the room and sheer blind on the window side.

Link your blinds

Using Acmeda Easy link we can link upto three roller blinds together so they move as a group. This can be controlled by a chain control or a motor.

Life is easier with motorised roller blinds

There is lots of reasons you should consider motorised Roller blinds.

- Move multiple blinds with the press of a button
- Blinds less likely to get dirty or damaged as avoiding human touch
- Easy to use in hard to reach places
- With Acmeda Pulse you can control your blinds from anywhere in the world through your smart phone
- Choice of Li-ion rechargeable battery motors or wired motors for tall or unreachable windows
- Open and close your blinds with your voice using Google Home or Amazons Alexia

We only use the best parts to make our Rollers

JUST FLOORING use trusted brands to manufacture the best performing Roller blinds you will find in Perth. There are lots of options to choose from when ordering Roller blinds.

Perfectly Balanced by Design, Perfectly Weightless in Operation

What is ZeroGravity?

The design is simple. The weight of the ZeroGravity spring perfectly offsets the weight of the blind over the entire range of travel. This means that users can put the blind up or down with the lightest touch. It's truly world first innovation in the roller blind category. Chain Free Operation - Child Safe with Zero effort.

Use the ZeroGravity spring to create the perfect chain-less blind that can be raised and lowered with the lightest touch. No chain required. Perfect for family homes. Chain Operation - Light, Smooth & Effortless Attach the ZeroGravity spring to a SunBoss clutch to transform your roller blind- no matter how wide, what fabric weight or what tube diameter- into something truly effortless to operate.

It's the fabric which makes our blinds so special

Just Flooring blinds are made in Perth, and only use the best parts and fabrics available.

You can choose from four types of fabric, Blockout room darkening, light filter translucent, sunscreen sheer or metallic sheer fabric.

Blockout fabric- Most commonly used in Perth to keep out the heat and make bedrooms/Theatre rooms dark.

Light Filter fabric - Perfect for family rooms/Games rooms to let in natural light while reducing the heat.

Sheer Sunscreen fabric- If you have room with a view, with sheer you see out during the day, outside can't see back in. This is in reverse at night if internal lights are turned on though.

Metallic Sheer fabric- Mainly used for commercial office buildings, this fabric lets some light in but cuts out majority of the heat with its metallic reflective backing.

We only use the best fabrics from around the world

Our designers can help you choose the perfect plain or textured fabrics from trusted brands such as **Shaw, Wilson, Uniline, Hunter Douglas, Shann** and **Textstyles**. Most of our fabrics are stain and mould repellent too and easy to clean. Fabric is mainly made of Polyester.
